Jemima Farley-Rose

Front-End Software Engineer

github.com/mimafarleyrose   jemimafarleyrose@gmail.com   http://mimafarleyrose.com/

Relevant Experience

Boclips, London — Software Engineering Internship

March 2020 – Current

I have been working as part of the engineering team at Boclips. I have been pairing with members of the team as well as soloing on both front and back-end stories shipping code daily.

- ❖ Working mainly with React and Typescript and Kotlin.
- ❖ Using Test-driven development, testing with Jest, React Testing Library and Enzyme
- ❖ Working with the Boclips API in a variety of different projects.
- ❖ Working with Bit components

Code First Girls, London — Volunteer Instructor

July 2020 – Current

I have been volunteering with CFG on their Introduction to Web Development course, I have found the process immensely rewarding and have enjoyed mentoring and teaching.

- ❖ Presenting 2-hour long sessions with other instructors on basics of web development including HTML, CSS, Javascript and Git
- ❖ Answering questions from students on Slack

ScreenCloud, London — Business Development Executive

May 2019 –March 2020

Although this role was sales focused, I took on some project involving coding and automation in addition to the regular duties of the role.

- ❖ Automating repeat sales processes using Zapier
- ❖ Creating dashboards in google data studio to track key metrics
- ❖ Building out processes for a new customer satisfaction team to allow one person to manage over 3000 customers effectively

Skills
